AFC NARROWBANDING SPONSORSHIPS

AFC is looking for sponsors to help spread the word to public safety licensees regarding the narrowbanding deadline. There are approximately **79,000** licensees that have not yet converted from wideband operations. If these licensees do not comply with the narrowbanding deadline, they would be in jeopardy of losing their license to operate. This is not acceptable for public safety communications. AFC will aggressively take action to notify all public safety licensees to avoid what could be a very costly oversight on their part.

**The final deadline to convert to narrowband operations is
January 1, 2013.**
